

Dating Platform Support Knowledge Base - Overview

This knowledge base supports a dating application similar to Tinder, designed for matchmaking and social connections.

The RAG assistant uses this data to provide accurate responses to user queries related to accounts, matches, and safety.

Primary features include profile creation, swiping, messaging, and premium subscriptions.

The goal is to improve user experience by resolving issues quickly and consistently.

Core Features

Profile Setup: Users create profiles with photos, bios, and preferences.

Matching System: Users swipe right to like and left to pass. Matches occur when both users like each other.

Messaging: Only matched users can send messages.

Premium Features: Includes unlimited swipes, passport (location change), and profile boosts.

Verification: Photo verification helps ensure authenticity of profiles.

Common Issues & Troubleshooting

Login Issues: Users may face login problems due to incorrect credentials or social login failures.

No Matches: Encourage users to update profiles, add photos, and adjust preferences.

Messages Not Sending: Check internet connection or app version.

App Crashes: Recommend updating the app or reinstalling.

Payment Issues: Verify billing details and check with payment provider.

Safety & Community Guidelines

User Safety: Users should avoid sharing personal information such as phone numbers or addresses too early.

Reporting: Users can report inappropriate behavior directly within the app.

Blocking: Users can block others to prevent further interaction.

Content Policy: No harassment, hate speech, or explicit content allowed.

Privacy: User data is encrypted and handled according to privacy laws.

Frequently Asked Questions

Q: How do I get more matches? A: Improve your profile with high-quality photos and an engaging bio.

Q: Can I change my location? A: Yes, with premium features like Passport.

Q: How do I delete my account? A: Go to settings and select delete account.

Q: What happens if I get reported? A: Reports are reviewed and may result in warnings or bans.

Q: Can I undo a swipe? A: This feature is available for premium users.
